

# COMMERCIAL SERIES

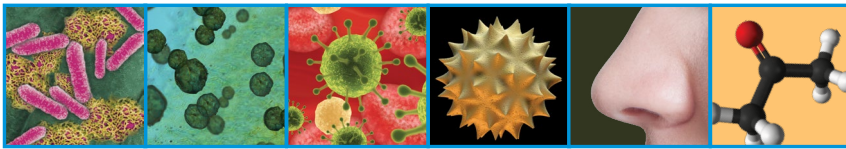

## APCO® Rack System

Safely remove odor-causing and toxic volatile organic compounds (VOCs) from the air with the world's most advanced ultraviolet germicidal irradiation (UVGI) system. The APCO® Rack System offers easy and flexible installation and includes an advanced multi-voltage water-resistant power supply. It sterilizes mold on HVAC coils (a biofilm of only 0.002" can reduce efficiency by 37%!) It also features the same award-winning PCO/carbon technology used in our top-selling APCO® line of residential whole-house air purifiers, scaled up for commercial applications. All parts (except lamps) are covered by a lifetime warranty.

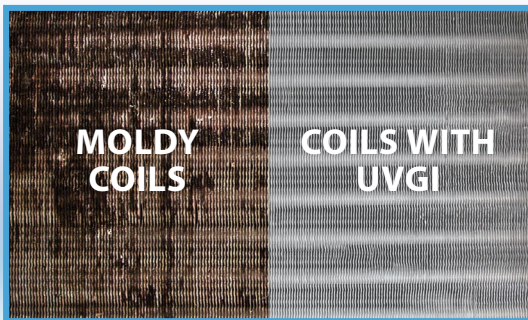

### FEATURES

- Removes odor-causing VOCs from the air without ozone
- PCO/carbon cells never need to be cleaned or replaced
- Scalable design allows wide variety of multi-lamp configurations
- High quality water-resistant lamps
- Water-resistant power supply, for normal or high output lamp(s)
- Includes 10' cable & all mounting hardware except 0.5" EMT conduit
- Teflon® coating option for added safety
- Available with 32, 46, or 60 inch lamps

### Effective against these airborne contaminants

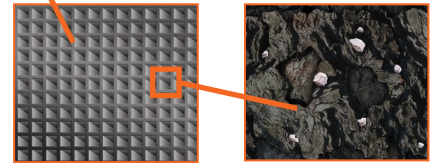

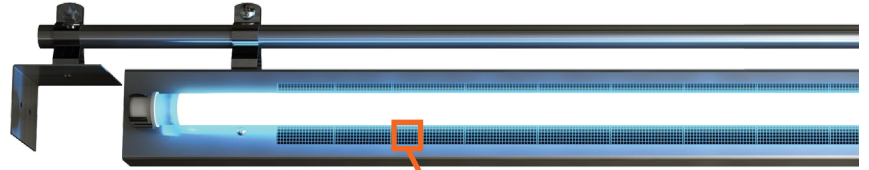

Bacteria    Mold    Viruses    Allergens    Odors    VOCs

UVGI suppresses microbial growth on HVAC coils and surrounding areas

## UVGI Disinfection + Odor Control

APCO® PCO/carbon cells are composed of a proprietary mixture of activated carbon infused with titanium dioxide.

Safe ozone-free odor reducing technology

### Safety & Control

Get the most out of your installation with the optional **Safety Interlock Switch** and **UVGI System Control Box**.

### Design it Right

Our free BlueCalc™ service/software makes system configuration & ROI estimation easy.
